Recommendation Letter / To Whom It May Concern

It is my pleasure to strongly recommend Mr. Malik Khizar Hayat for PhD program. He did his MS thesis under my supervision and proved himself one of the best in the research among my students. His hunger for research is great and he showed a great commitment. We were also able to publish a paper in one of the well reputed Impact Factor Journal “Scientometrics” from his master thesis as well.

The Scientometrics Journal paper was solely written by him. I was amazed to see that once I told him to follow WWW, SIGIR and Scientometrics papers writing style he did it in excellent way. His English writing skills are clear from the paper and he can speak good English. He is very good individual and group member. He is also helping me currently with few papers as contributor. He is always following deadlines strictly.

He is good programmer, he is good at data processing, features extraction from data according to his requirement and large data handling abilities. All the work in Scientometrics paper was done by himself.

Please feel free me to contact me in case of any further inquiry. Overall Khizar will be a good infect very nice addition to any research lab. He is really very nice boy with very good abilities to learn from people and environment and in group he is great help. I Wish him great success in life.

Dr. Ali Daud
Associate Professor (Supervisor)
